TECHNICAL SKILLS

Programming Languages

Java, Python, C#, JavaScript, Dart, PHP, SQL

Frontend Technologies

ReactJS, NextJS, Tailwind CSS, HTML, CSS, JavaFX

Mobile Development

Flutter, Android Development (Kotlin), iOS Cross-Platform Development (swift)

Backend Technologies

Node.js, Express.js, FastAPI, JSP & Servlets, Laravel

Databases & Cloud

MySQL, MongoDB, Firebase Firestore, SQLite, AWS

AI / ML / AR

TensorFlow Lite (TFLite), Gemini API, OpenRouter API, Neural Networks, Computer Vision, Augmented Reality

Tools & Methodologies

Git & GitHub, Agile Scrum, REST APIs, WebSockets, PHPUnit Testing, Firebase Authentication

SACHINI WIJESUNDARA

Software Engineering Undergraduate

PROFILE

Passionate Software Engineering undergraduate with hands-on experience in full-stack development, mobile application development, AI/ML systems, IoT solutions, and AR technologies. Skilled in Flutter, React, Java, Python, Firebase, and cloud-based AI services. Experienced in developing scalable web and mobile applications, secure authentication systems, and AI-powered real-time solutions. Strong problem-solving abilities with experience working in Agile/Scrum environments and delivering innovative software projects.

EDUCATION

2022-2023	National School of Business Management Foundation Program - NSBM Green University
2023-2026	University of Plymouth (UK) BSc (Hons) Software Engineering (Reading) Expected Graduation: 2026

PROJECTS

AI-Powered AR Mobile Cosmetics & Beauty Try-On Application (Final Year Project)

Developed an AI-powered augmented reality beauty application enabling users to virtually try cosmetic products in real time. Implemented live makeup rendering using native GPU rendering and Flutter UI. Integrated AI-based Makeup and hair colour try-on, hairstyle matcher, and skin/hair analysis features using trained TFLite models. Added e-commerce integration, product comparison tools, admin & delivery portals. Integrated Gemini API and OpenRouter APIs for AI-powered recommendations and assistance.

Technologies: Flutter, Firebase, TFLite, AR, Gemini API, OpenRouter API

CareLink – Healthcare Mobile Application

Developed a healthcare mobile application enabling real-time doctor appointment booking and medicine ordering. Implemented secure medical record management and notification systems.

Reduced hospital queue management issues through real-time scheduling and e-pharmacy integration.

Technologies: Flutter, Firebase, Firestore, Authentication

SOFT SKILLS

- Problem Solving
- Team Collaboration
- Leadership
- Communication
- Adaptability
- Agile Teamwork
- Critical Thinking
- Time Management

ACHIEVEMENTS AND ACTIVITIES

- Developed multiple AI-powered and full-stack applications
- Participant – Ignite competition
- Experience working with Agile Scrum methodologies
- Strong interest in AI, AR, Mobile App Development, and Cloud Technologies

LANGUAGE

English	Advance
Sinhala	Advance

Secure Password Management System

Built a secure password management system with AES-256 encryption and SHA-256 hashing. Implemented OTP-based two-factor authentication through email verification. Designed a modern dashboard UI using ReactJS and Material UI.

Technologies: ReactJS, FastAPI, SQLite, AES-256, SHA-256

Full-Stack E-Commerce Platform – Sudu Araliya Food City

Developed a responsive e-commerce application with live customer-admin chat functionality. Implemented real-time communication using WebSockets. Worked using Agile Scrum methodology for project management and iterative delivery.

Technologies: ReactJS, MongoDB, AWS, Tailwind CSS, WebSockets

Charity Fund Collection Mobile Application

Built a cross-platform charity donation mobile app supporting secure donations and real-time updates.

Developed admin dashboards and integrated chatbot support for FAQs. Implemented Firebase Authentication and Firestore for secure real-time data synchronization.

Technologies: Flutter, Firebase, Stripe, EmailJS

Online Movie Seat Booking System

Developed a dynamic online movie booking system with real-time seat management and booking functionality.

Technologies: Java, JSP, Servlets, MySQL

Café Management System

Developed a Windows Forms café management system with admin and cashier modules for operational management.

Technologies: C#, .NET Windows Forms

IoT Water Quality Monitoring System

Designed an IoT-based system to monitor water quality metrics such as pH, turbidity, and temperature in real time. Integrated cloud-based monitoring and alert systems.

Technologies: ESP32, IoT, Sensors, Cloud Integration

Real-Time Air Quality Monitoring Dashboard

Developed an air quality monitoring dashboard with live AQI visualization and interactive maps. Implemented secure admin panel and testing workflows.

Technologies: Laravel, MySQL, Leaflet, PHPUnit

AI-Based Student & Staff Issue Reporting System (Ignite Competition)

Developed an AI-powered issue reporting platform for university students and staff. Integrated Gemini API for intelligent issue categorization and assistance.

Technologies: Gemini API, Full Stack Development

HCI 3D Furniture Visualizer

Developed a dual-view 2D/3D furniture visualization system with dynamic object customization.

Implemented secure authentication and persistent local storage.

Technologies: Java, JavaFX

CERTIFICATIONS

- OCI AI Foundations Associate (2025) – Oracle
- LinkedIn Learning – Advanced AI: Transformers for Computer Vision
- LinkedIn Learning – Understanding Augmented and Virtual Reality: An Introduction
